Caladium bulbs are safely planted outdoors when night time temperature are staying consistently above 65 degrees.

Caladium bulbs should be planted about 2 inches under the soil. If you have no idea about top and bottom just plant it any which way and it will grow.

The following chart shows our recommended planting distances if you are planting a large bed. These spacing distances will typically result in a nice full bed with no gapping between plants. These same measurements also work for row planting.

| Grade Bulb | Diameter | Planting Distance |
|------------|----------|-------------------|
| #2         | 1-1½"    | 2-4"              |
| #1         | 1½-2½"   | 4-7"              |
| Jumbo      | 2½- 3½"  | 8-10"             |

Water moderately when first planted.
